- Ultrasonic scaling, Subgingival Curettage, Polish & Fluoride  
Comprehensive Oral Exam Performed

#### **Extraction Pricing**

Extractions are only ever performed if the diseased tooth cannot be saved and the patient would benefit if the diseased tooth is extracted. Extraction pricing varies on how difficult the extraction will be. This cannot be determined until the patient is under anesthesia and Dr. Brandy can get a closer look at the teeth. Extractions are an additional cost and will be discussed at the time of the dental cleaning.

#### **Antibiotics**

Antibiotics are not always sent home with the patient; however, if Dr. Brandy sees that the patient would benefit from antibiotics due to the condition of the oral cavity, there will be an additional charge- you will be informed before medication is dispensed.

#### **Essential Pain Management Package (EPM) \$65**

If any extractions are performed it is highly recommended that the patient receives the pain management package. The EPM package includes a 24 hour pain injection at the time of the dental and 5 days of pain medication to go home with the patient.
